

ATM ARMOR

Maximum Security

Monitoring Features

Easy to Install

BLACKBOX

MALWARE

PROTECTION

The ultimate ATM **BlackBox**
and **Malware** defence

SPL
GROUP

ATMs

ATM SOFTWARE

CASH AUTOMATION

SECURITY SOLUTIONS

Key Features

- ✓ Black-box protection on all ATM series regardless of dispenser firmware version
- ✓ Malware protection
- ✓ One solution for all major vendors
- ✓ Virtual host protection, provided that authentication is performed outside the ATM
- ✓ Transparent to service engineers and cash replenishment
- ✓ Ability to connect external alarm system

Malware Protection

Main Functions

- ✓ Malware can be considered as a software black-box
- ✓ Existing dispenser protection solutions from ATM vendors don't protect against malware attacks
- ✓ ATM Armor protects equally against all types of jackpotting attacks
- ✓ ATM Armor software protects itself from being manipulated and reverse-engineered

BlackBox Protection

Main Functions

- ✓ ATM Armor prevents black-box attacks by enhancing dispenser functionality with withdrawal authorization mechanism
- ✓ Dispense operation is blocked if initiated without authorization from the bank host or local ATM Armor Software
- ✓ Strong encryption algorithms eliminate traffic 'sniffing' and forgery

~ 20 min
installation time

Dynamic session
AES-128 session key

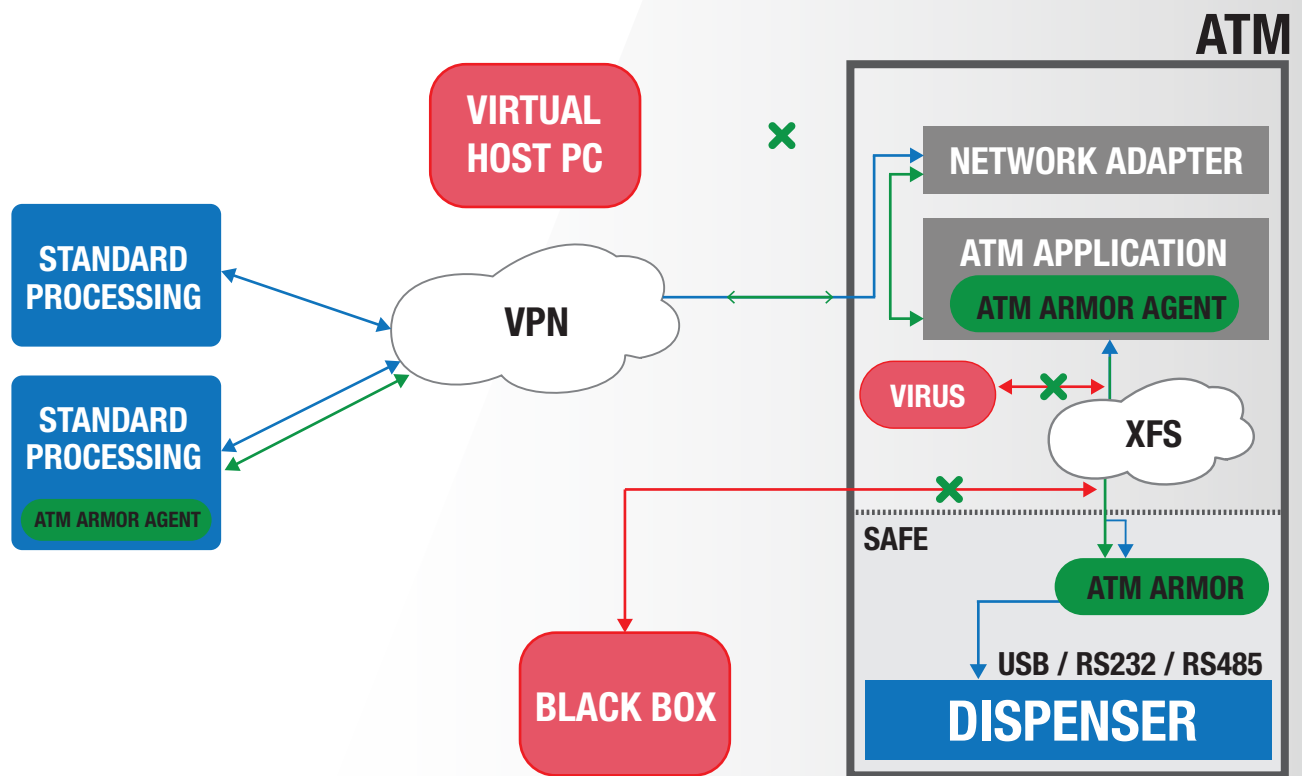

Unique private key
for each controller

Protected from being
reverse engineered
