# THE SELF-SERVICE SOLUTION COMPLETES THE SECURECASH FAMILY

**The Paymaster self-service kiosk allows commerce in all sectors to reduce their personnel costs, generating savings in general expenses.**

In this way, employees can focus fully on the needs of customers, allowing them to improve the service. Paymaster technology accepts payments, can help stores increase revenue, increase traffic and create a better experience for the customer.

Thanks to the Paymaster we help companies to strengthen their image as high-tech commerce.

## Main functions

- ✓ Identify cashiers by access code or fingerprint
- ✓ Count and validate customer payments (bills and coins)
- ✓ Return of the exact change (bills and coins)
- ✓ Simplifies change of shift and reconciliation and closing cash desk with the automatic banknote straightener
- ✓ Control the accounting and operational status of the unit locally or remotely to optimize cash availability
- ✓ Prevent internal fraud by limiting employee access to stored cash
- ✓ Deter potential theft with alarm activation if the safe is forced open or its location is shifted

## Size and ergonomics

- Its small size and ergonomics allow an easy installation in any location.
- Securecash comes in two configurations:
  1. Securecash MKI  
Compact unit suitable for easy installation.
  2. Securecash MKII  
Standing unit provided with any level of Safe Chest.

## Employee productivity

- Employees can focus on value add customer service activities, as Securecash handles all the balancing, validating and counting.
- Shift changes and cash closings are completed with greater ease as reconciliation ensures accounts are properly maintained.

## ✓ Coin recycler

Secure and removable coin deposit box with a 1,500-coin capacity (non-recyclables and hopper overflow)

Accepts all denominations including 1 eurocent.

Accepts and validates coins in bulk (up to 100)

Validates 3-4 coins per second

Rejects non-genuine coins

Recycles up to eight denominations

Dispenses up to eight denominations

Multi-coin hoppers can handle up to four denominations per hopper, with a capacity of 325 to 775 coins each

Automatic loading

Orderly unloading of hoppers to output mouth

## ✓ Functions featured

- ▶ Integrated 15-inch screen.
- ▶ Contactless card reader, chip and magnetic stripe.
- ▶ Card payment solution does not require a gateway of payment since it connects directly with "Redsys" without need for any intermediary, with the consequent saving for the commerce.

## ✓ Banknote recycler

Uses a single-mouth banknote reader

Supports all denominations

Accepts and validates banknotes one by one

Accepts banknotes in any order and on any face

Validates 1,5 -2 banknotes per second

Rejects non-genuine banknotes

Recycles up to three denominations in independent cylinders with a capacity of 50 banknotes each

Dispenses change in up to three denominations

Store non-recyclable denominations or excess of recycled ones (500 notes for MKI and 2,500 for MKII) in a removable safety box

Orderly unloading of cylinders to mouth or to safety transportable stacking cassette
