SECURITY SOLUTIONS

Securecash substantially improves the management of banknotes and coins

Securecash provides optimized cash management at any point of sale, improving cash control and providing full security coverage to prevent internal fraud and to deter potential theft.

Main functions

- ✓ Identify cashiers by access code or fingerprint
- ✓ Count and validate customer payments (bills and coins)
- ✓ Return of the exact change (bills and coins)
- ✓ Simplifies change of shift and reconciliation and closing cash desk with the automatic banknote straightener
- ✓ Control the accounting and operational status of the unit locally or remotely to optimize cash availability
- ✓ Prevent internal fraud by limiting employee access to stored cash
- ✓ Deter potential theft with alarm activation if the safe is forced open or its location is shifted

Size and ergonomics

- Its small size and ergonomics allow an easy installation in any location.
- Securecash comes in two configurations:
 1. Securecash MKI
Compact unit suitable for easy installation.
 2. Securecash MKII
Standing unit provided with any level of Safe Chest.

Employee productivity

- Employees can focus on value add customer service activities, as Securecash handles all the balancing, validating and counting.
- Shift changes and cash closings are completed with greater ease as reconciliation ensures accounts are properly maintained.

THE **MK II SYSTEM** IS A NEW VISION OF THE TRADITIONAL INTELLIGENT DRAWER MK I ADDS INTEGRATED POS, POS READY AND GREATER CONNECTIVITY

MORE FUNCTIONS AND BENEFITS

- ✓ The MK II system shares all the main functions of its brother the MK I, as well as its Recycling features of coins and bills, security and dimensions of the cabinet.
- ✓ The MK II maintains and increases the current benefits of predecessor, the MK I, as to connectivity, integration of devices and POS.

POS ready

- POS READY option allows you to integrate the different point of sale devices in a complete and compact solution

VESA stand

- It incorporates Vesa stand support for POS assembly, installed on the front of the equipment to be handled by our employee, or in the back of the same then clients enters directly the money in the machine, thus allowing complying with the standards of food handling and hygiene of your business.

EASY Connection

- Securecash MK II provides ease connection for different devices at the point of sale, eliminating the problem of cables that have to be hiding and protect so that they do not cause problems in the normal operation of our business.

Integrated connections

- Switch and device connection hub (Ethernet, USB), complete the POS READY solution offering to our customers an advanced, compact system and innovative automatic cash management and point of sale.
